PRODUCT INFORMATION

PRODUCT: 80-7505 Series

DESCRIPTION:
McCloskey® Man O’ War® Marine Spar Varnish

FEATURES:
Man O’ War Marine Spar Varnish gives the ultimate protection to your interior and exterior wood surfaces. Unlike polyurethane clear finishes which become brittle, crack and peel when used outdoors, this marine quality varnish remains flexible and absorbs the expanding and contracting seasonal movement of the wood. This clear finish is formulated with ultra violet absorbers to resist the sun’s degrading rays and protect the wood’s natural appearance. This tough finish is ideal for heavy use surfaces.

WHERE TO USE:
For interior and exterior wood surfaces that are subjected to sun, moisture and weather. Ideal for wood doors and trim, window sills, outdoor furniture and crafts, railings and wooden boats. Use on properly prepared bare, stained or previously varnished surfaces. Do not use on wooden decks or steps, log homes, wood siding or wood boats below the water line.

SURFACE PREPARATION:
Surfaces painted prior to 1978 may have lead-based paint.

General: Clean and dry surface thoroughly, removing all traces of wax, dirt, dust, defects and blemishes. Remove gloss with sandpaper or liquid gloss remover. Do not apply over lacquer, shellac or stearated sanding sealers.

New or Stained Wood: Smooth wood with multiple sanding steps using successively finer grades of sandpaper. Stain, if desired and allow to dry overnight and sand lightly again. Remove all sanding dust very carefully with a tack cloth before finishing.

Varnished Wood: Remove all previous coatings and stains in poor condition with sandpaper or paint and varnish remover (following manufacturer’s instructions and safety precautions). Then follow new wood instructions. Previous varnish in good condition merely needs to be clean and have the gloss dulled.

COVERAGE:
One gallon covers approximately 300-400 sq/ft. (28-37m²) depending upon surface porosity. Do not thin.

FILM THICKNESS:
4.0 Wet       1.7 Dry

DRY TIMES:
Dries to the touch in about 6 hours, wait 24 hours before recoating. Dry times are longer in high humidity or cool temperatures. Apply only when surface and air temperatures are 50-90°F (10-32°C) during application and drying time. Avoid application in direct sunlight or when rain is threatening or late in the day when dew may affect the drying time.
APPLICATION:
1. Stir before and occasionally during use making sure not to create bubbles. DO NOT SHAKE!
2. Before applying the finish, check effect by testing on an extra piece of the same wood or by applying to a hidden part of the object. 3. Apply a uniform, thin coat using a high quality, clean polyester or natural bristle brush. Do not apply with a roller. 4. Brush in even strokes in the direction of the wood grain. Use care on vertical surfaces to avoid runs.
5. Apply at least two thin coats to all surfaces and especially the edges. For maximum protection apply up to four coats. 6. Between coats, allow to dry 24 hours and sand lightly. Remove all sanding dust before applying each additional coat.

STORAGE AND DISPOSAL:
Keep container closed when not in use. Do not transfer contents to other containers for storage or disposal. In case of spillage, absorb with inert material such as sand or kitty litter. Dispose of contaminated absorbent, container and/or unused contents in accordance with local, state and federal regulations. Danger: Rags, steel wool, sanding dust or waste soaked with this product may spontaneously catch fire if improperly discarded. Immediately after each use, place rags, steel wool, sanding dust or waste in a sealed, water-filled metal container.

THINNING/CLEAN UP:
Do not thin. Clean brushes and tools in mineral spirits. As you work, keep a cloth handy to wipe up drips and spills.

PACKAGING:
- Gallons: 2 Pack
- Quarts: 4 Pack
- Half Pints: 6 Pack
